## GCF-RESILIENCEHURRICANE

Resilience to hurricanes in the building sector in Antigua and Barbuda

### Quick Facts

Countries	Antigua and Barbuda
Financial Institutions	Green Climate Fund (GCF)
Bank Risk Rating	B
Borrower	Government of Antigua and Barbuda
Sectors	Climate and Environment, Humanitarian Response
Investment Type(s)	Grant
Investment Amount (USD)	\$ 32.70 million

### Project Description

Among some scattered information, we can pick that: "Overall, the project will confer direct adaptation benefits to ~73,216 vulnerable people in Antigua and Barbuda, and indirect benefits to the entire population of the country, by reducing the adverse impacts of extreme climate events on human life and enabling the country's major economic sectors to resume business as usual more quickly following these events. Direct health benefits are also expected to incur through the improved provision of clean water, increased operability of clinics during a storm, integration of storm shelters into existing clinics and improved storage for vital medication that are usually damaged by an intense storm. Further benefits are expected across the Caribbean, with Antigua and Barbuda serving as an example of climate-adaptive building practices for Small Island Developing States (SIDS)."

## Investment Description

- Green Climate Fund (GCF)

The total financing (GCF + co-finance) amounts to USD 46.1 million.
