Climate-resilient food security for women and men smallholders in
Mozambique through integrated risk

Quick Facts

Countries	Mozambique
Financial Institutions	Green Climate Fund (GCF)
Status	Approved
Bank Risk Rating	C
Voting Date	2019-11-29
Borrower	Ministry of Agriculture and Food Security (MASA); Ministry of Land, Environment and Rural Developmen
Sectors	Agriculture and Forestry
Investment Type(s)	Grant
Investment Amount (USD)	\$ 9.25 million
Grant Amount (USD)	\$ 9.25 million
Project Cost (USD)	\$ 10.00 million

Project Description

According to bank documents, the project has three components:

- 1. Reduced exposure to climate risks of food insecure smallholder women and men through CRA as well as watershed restoration and enhancement.** Through an integrated approach, which includes both Disaster Risk Reduction and Climate Change Adaptation, the exposure and vulnerability to climate risks will be reduced. Exposure to climate risks will be mitigated by protecting and enhancing relevant environmental functions and improving agricultural practices (Disaster Risk Reduction). At the same time, vulnerability to these risks will be decreased by the adoption of climate change adaptation measures at the household, community, and watershed levels (Climate Change Adaptation). Firstly, climate-resilient agricultural (CRA) practices, like Minimum Soil Disturbance, Retention of Crop Residues, Crop Diversification, and Intercropping will be promoted among 16,000 farming households, through trainings, demonstrations, and provision of government-approved farming implements, which delimits the use of GMOs.
- 2. Enhanced and sustained adaptive capacity of targeted participants through a combination of context-specific, integrated risk management tools and market based opportunities.** The farmer clubs (including all its members) have to adhere to the CRA and asset creation calendar of activities in order to be eligible to have access to the activities under component 2. This will be tracked through monthly, project process and output monitoring by partners, including MASA and MITADER, for which WFP is ultimately responsible, including validation through regular field visits. Adherence to Component 1 practices will be promoted through integrated risk management tools that help address evolving climate risks and market-based opportunities that remunerate climate adaptation action. Firstly, farming households benefitting from Component 1 (16,000) will be supported to conduct savings through village saving and loans groups (VSL), as a means to develop buffers to shocks (idiosyncratic and covariate). Building on these, and the improved/adapted livelihood practices, the groups will be supported to have access to formal loans from financial institutions for productive investments.
- 3. Informed adaptation planning and decision-making across smallholders, communities and national/local authorities through generation and use of climate information.** Recognizing that to effectively employ these adaptation and risk management strategies for resilient livelihoods and greater food security, there is a need to grow awareness and understanding of the changing climate and weather, as well as its impacts on livelihoods and food security, the project will support the generation and dissemination of tailored information and advisories for communities and authorities. As the point of departure, national meteorological capacities will be strengthened to effectively monitor and forecast drought events. Leveraging on this, as well as historical and future climate trend analysis, climate awareness campaigns will be designed and operationalized, reaching 80,000 beneficiaries.

ACCESS TO INFORMATION

Requests for project information may be submitted using the IDP Request for Information by email to: disclosure@gcfund.org.

You can also submit an information request using this online form: <https://www.greenclimate.fund/about/disclosure/form>.

Additionally, if information requested is denied, an appeal can be filed to the Information Appeals Panel: iap@gcfund.org. You can learn more about the Information Appeals Panel at: <https://www.greenclimate.fund/about/disclosure/appeals>.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating [problem solving or conducting a compliance process](#). You can learn more about the Independent Redress Mechanism and how to file a complaint at <https://irm.greenclimate.fund/>.

You can access a video about the IRM (English) at: <https://youtu.be/1LanbriVhfs>.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: <https://irm.greenclimate.fund/>.
