Project Description

This project will strengthen hydrometeorological and early warning services in Belize, Trinidad and Tobago, and the broader Caribbean region by achieving three complementary outcomes. Outcomes 1 and 2 focus on building the technical and institutional foundation for effective early warning by improving governance, infrastructure, and forecasting capabilities while enhancing resilience across key sectors. Outcome 3 focuses on improving risk communication and preparedness at the community level, ensuring that timely, actionable climate and weather information reaches vulnerable populations.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating [problem solving or conducting a compliance process](#). You can learn more about the Independent Redress Mechanism and how to file a complaint at <https://irm.greenclimate.fund/>.

You can access a video about the IRM (English) at: <https://youtu.be/1LanbriVhfs>.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: <https://irm.greenclimate.fund/>.
