Achiras Wind Project

Early Warning System
Achiras Wind Project

IADB-AR-L1278

Quick Facts

Countries	Argentina
Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	U
Investment Type(s)	Loan
Loan Amount (USD)	$ 10.00 million
Project Cost (USD)	$ 10.00 million

Project Description

The Project consists of the construction, operation and maintenance of a 50 MW wind farm and its associated facilities including a 132kV 16km transmission line to be located southwest of the province of Cordoba, in the department of Rio Cuarto, Argentina. The Project, CP La Achiras S.R.L, a vehicle fully owned by CPSA, signed a 20-year power purchase agreement with the wholesale electric market administrator ("CAMMESA") to inject energy to the municipal interconnection system via the 132 kV Villa Mercedes-Rio Cuarto substation. CPSA is the largest private generator in Argentina, with 3,791 MW of installed capacity, and producing approximately 22% of the energy generated in the SADI in 2016.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
