

 Early Warning System

IADB-AR-L1279

First Stage Expansion of Capacity and Safety Improvements in the
Cristo Redentor System Corridor

Quick Facts

Countries	Argentina
Financial Institutions	Inter-American Development Bank (IADB)
Status	Proposed
Bank Risk Rating	B
Investment Type(s)	Loan
Investment Amount (USD)	\$ 200.00 million
Project Cost (USD)	\$ 215.00 million

Project Description

The general objective of the operation is to contribute to the general objectives of the credit line, specifically to: (i) increase capacity; And (ii) improve transportation safety, on the access roads to the tunnels that make up the Cristo Redentor System Corridor, by constructing variants in urban areas and rectifying curves on the Argentine side. The operation also contributes to the adaptation to the CC through the improvement of the resilience in the interventions.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
