Project Description

The project consists of the design, construction and operation of 80MWac/93.7MWdc photovoltaic solar power plant and its associated facilities including access roads and transformer substations (the "Project"). The Project will be located near the City of Iglesia, in the Province of San Juan, Argentina. Once built the Project will sell the energy production to CAMMESA, the Argentinean wholesale energy administrator, under a 20-year power purchase agreement (the "PPA"). The PPA was awarded to Jinko Solar under the RenovAr program. The energy produced by the Project will be injected to the Argentina's interconnection system (¨SADI¨) by splitting the existing 132kV transmission line connecting the Jachal and Calingasta substations. The C2F Loan is approximately 20% of the total IDB Group financing for the project.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
