Project Description

The objective of the program is to promote private participation in productive investment to contribute to economic growth in Argentina. The program will help mitigate the risks that inhibit private financing for productive development through: (i) attracting a significant volume of private investment (institutional investors, international investors and other national or multilateral institutions); and (ii) promote efficient financing of a portfolio of private productive infrastructure projects, which matches the investors' performance, risk and term needs with the long-term needs of the projects.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
