| Project Cost (USD) | \$ 1.66 million |

Project Description

The project proposes to operate an innovative system of waste-to-energy which it could develop "briquettes" from pruning residues and other organic wastes. A semi-industrial briquette production system will be developed from an extrusion process. There will be five centers installed of briquettes, in the Municipal ejido of Bariloche, which will be operated by SMEs and pre-existing cooperatives. The briquettes produced in the processing plant will supply all the demand for the combustion material of the "Plan Calor" that the Bariloche Government executes, through a purchase agreement (off-take agreement).

Investment Description

- Inter-American Development Bank (IADB)

TOTAL COST: USD 1,664,800

COUNTRY COUNTERPART FINANCING: USD 833,200

IADB FINANCING: USD 831,600

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
