Loan Amount (USD)	$ 0.25 million
Project Cost (USD)	$ 0.28 million

Project Description

Obtain a remediation project for the residual liabilities of the San Antonio Oeste Project, Province of Río Negro, by evaluating possible technological alternatives, based on internationally accepted practices and standards and the applicable environmental regulations.These alternatives may include, for example, in situ remediation methods, neutralization, chemical stabilization, or removal and final disposal, among others.The focus of the project must follow the principles of sustainability, considering the environmental, social and economic dimensions.

Investment Description

- Inter-American Development Bank (IADB)

The bank did not provide information about the investment type at the time of publication of this snapshot

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
