Climate Change and Green Innovative Strategies For The Development Of Metropolitan Areas

Climate Change and Green Innovative Strategies For The Development Of Metropolitan Areas

Quick Facts

Countries	Argentina
Financial Institutions	Inter-American Development Bank (IADB)
Status	Proposed
Bank Risk Rating	U
Borrower	Government of Argentina
Sectors	Climate and Environment, Construction, Law and Government, Technical Cooperation
Investment Amount (USD)	$ 0.30 million
Project Cost (USD)	$ 0.30 million

Project Description

As stated by the IADB, the objective of this TC is to support the preparation and execution activities of the DAMI II (AR-L1243) and DAMI III (AR-L1363) Programs, as well as programs with similar specific objectives, considering mitigation and adaptation measures to climate change and the aspects of innovative green strategies for the development of Metropolitan Areas. To this end, in addition to the studies carried out, the project will seek to strengthen the technical and management capacities of the Ministry of Territorial Development and Habitat, the agency responsible for both programs.
The specific objectives of this TC are:
(i) contribute to the development of metropolitan projects with climate change adaptation and mitigation considerations by generating tools and climate models that consider the particularities of each region of the country;
(ii) guide the actions of DAMI II towards the fulfillment of the commitments assumed by Argentina in its Nationally Determined Contribution regarding climate change adaptation and reduction of greenhouse gas emissions based on innovative strategies adapted to the country, and include these aspects in the design of DAMI III;
(iii) develop environmental and economic sustainability strategies for DAMI III interventions; and
(iv) strengthen the management capacities of the technical teams implementing DAMI III in response to the country's climate change, gender and diversity challenges.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
