Project Description

According to the IADB, this Technical Cooperation aims to contribute to improving the efficiency of public health spending in Argentina, with a particular focus on the subnational level. Specifically, it seeks to strengthen the National Government's capacity to comparatively assess the performance of provincial jurisdictions, guide technical dialogue with provinces, and support the formulation of national policies and guidelines that promote a more effective allocation and use of public health resources. At the same time, it seeks to strengthen the provinces' capacity to guide policy, budgeting, and management decisions toward a more efficient use of these resources, thereby contributing to the financial sustainability of the health system and enhancing its ability to translate spending into better health services and improved health outcomes.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
