Project Description

The objective of this project is to enhance Barbados' energy security, by diversifying its energy matrix and promoting the use of cleaner fuels for power generation and renewable energy. Specific objectives include: to (i) upgrade existing natural gas infrastructure to ensure natural gas service continuity; (ii) increase energy efficiency and renewable energy applications within the National Petroleum Corporation (NPC)'s and Barbados National Oil Company Limited (BNOCL)'s operations; (iii) enable implementation of a Public-Private Partnership project to import and supply liquefied natural gas for power generation; and (iv) provide technical support to NPC and BNOCL to foster organizational and operational efficiency.

Investment Description

- Inter-American Development Bank (IADB)

The cost of the program is estimated at US\$34,000,000 and will be financed by the IADB's Ordinary Capital (OC) resources. It is expected that the loan financed with resources from IADB will have a 6 year disbursement period.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
