IADB-BH-T1105

Support to the execution of the digital transformation project

### **Project Description**

As stated by the IADB, the objective of this Technical Cooperation (TC) is to enhance the institutional capacities in Bahamas through promoting adequate government frameworks for Identification Systems and Data Policies. This TC will support the implementation of the Loan Government Digital Transformation to Strengthen Competitiveness (BH-L1045). This TC complements the objective of the Operation BH-L1045 because making government procedures available online to reduce the cost of government bureaucracy, as well as increasing the use of ICTs in the public sector and fostering transparency of government activities, requires a specific framework in terms of Identification Systems and Data Policies. This framework will support all initiatives aimed at providing technological solutions, including those contemplated in the operation.

#### **ACCOUNTABILITY MECHANISM OF IADB**

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
