Community Centered Circular Solutions: Transforming Sargassum and Waste in Belize

Project Description

According to the IADB, the project's objective is to demonstrate the economic viability of the Static Pile Inoculated Compost Extension (SPICE) system to convert sargassum and organic waste into marketable compost and hydrolysate, creating jobs, reducing methane emissions, and supporting sustainable agriculture in communities in Belize.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
