Project Description

This project aims to improve the country's disaster risk management (DRM) governance and financial capacity by strengthening and modernizing the regulatory, institutional, and budgetary public policy framework for DRM, in line with Law 602 on Disaster Risk Management, and its enabling regulations, passed in April 2015 under the first operation in this series (3487/BL-BO). The program seeks to promote a process of regulatory and institutional reform that comprehensively addresses the three types of DRM: (i) prospective management that seeks to avoid the creation of future risk; (ii) corrective management aimed at reducing existing risk; and (iii) reactive management that seeks to respond to emergencies, either because an imminent threat exists or because a risk has materialized.

ACCOUNTABILITY MECHANISM OF IDB/ IIC

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
