IADB-BO-L1188

Bolivia resilient to climate risks

Quick Facts

Countries	Bolivia
Financial Institutions	Inter-American Development Bank (IADB)
Status	Proposed
Bank Risk Rating	B
Investment Type(s)	Loan
Investment Amount (USD)	\$ 40.00 million

Project Description

Bolivia resilient to climatic risks. The program is consistent with the CRF through the transversal theme of Climate Change and Environmental Sustainability by contributing to an improvement of the indicator related to the management and sustainable use of natural capital through specific actions of resilience to climatic risks. It is also consistent with the priority area of "Increasing productivity and diversification of the economy" of the 2016-2019 EBP because the operation will contribute to the strategic objective of "Reducing Vulnerability to Climate Change and Natural Disasters".

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
