Impact Evaluation of Obstetric Nurses on Maternal and Neonatal Health in Bolivia

Project Description

According to the IADB, the objective of this TC is to generate experimental evidence on the causal impact of incorporating obstetric nurses into primary health care on maternal and neonatal health in Bolivia by: (i) estimating the effect of the intervention (BO-L1198) on maternal service utilization, perinatal outcomes, and maternal and neonatal mortality, leveraging the staggered random assignment across 52 municipalities; and (ii) analyzing mechanisms, heterogeneity, and cost-effectiveness to inform scaling decisions in Bolivia and the design of similar IDB operations in the region.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
