Project Description

To generate a permanent and effective change in the low-income housing renovation market in Brazil (and the region), it is proposed to consolidate and scale the unique and innovative B2B2C solution developed by the Brazilian startup Vivenda. With a systemic and comprehensive approach, Vivenda's solution is unique in the low-income housing renovation sector in Brazil and in the region, as it provides a complete solution aimed at vulnerable families, consisting of: (i) offering a standardized technical service thanks to a system of micro franchises that simplify and cheapen interventions by qualified professionals; (ii) offering affordable micro financing thanks to innovative funding specifically for vulnerable populations; and (iii) offering lower cost and easily accessible building materials thanks to agreements with large national companies and neighborhood stores.

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
