Project Description

Pecsa, what the bank affirms is a sustainable cattle ranching B-corp operating in the Brazilian Amazon, is a growth stage startup which have been a reference for a new cycle of cattle ranching in the country (and in the region), by working with medium-sized producers to both significantly increase their productivity levels (up to x5) and implement best-in-class sustainable cattle intensification and CSA practices (up to 90% GHG emissions per KG produced), all that at market rates of return. PECSA is seeking USD 6m in debt to transition from its current experimental stage to a commercial operation, with enhanced impact along the beef value chain.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
