Project Description

The program's objective is to help boost the competitiveness of the state of Espírito Santo by improving freight logistics and its national and regional integration. Its specific objectives are to: (i) improve the level of service of the state's roads that are relevant to port connections; (ii) improve the state road network's connectivity with the ports, minimizing the negative impacts on the affected urban areas; and (iii) improve the efficiency of road intervention processes for the DER-ES.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
