Project Description

According to the IADB, the overall development objective for this transaction is to strengthen the integration of energy generation from Variable Renewable Sources (VRS) in Brazil's Northeast region into the national integrated system, promoting private capital to decarbonize energy supply services. The specific development objectives include: (i) expand the transfer capacity of the Northeast region's electric power grids; (ii) expand the financing of electric power systems that promote greater flexibility in the Brazilian electricity system; and (iii) support the implementation of energy storage technologies.

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
