### Project Description

According to the IADB, the objective of the operation is to improve biodiversity conservation and climate resilience, and to reduce disaster risk in the Sao Paulo Coast. The specific objectives are: (i) to improve environmental management and the efficiency of environmental enforcement; (ii) to increase the adoption of sustainable and inclusive agro-environmental practices; and (iii) to improve the coverage of disaster risk monitoring and early warning systems.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
