Support for Innovation in the Energy Sector - Rio Grande do Sul, Parana and Santa Catarina

Project Description

The objective of this technical cooperation is to support innovation in the electricity sector of the Brazilian States of Rio Grande do Sul, Paraná and Santa Catarina. The specific objectives are to: (i) support the development and implementation of innovative solutions to improve quality of power supply and energy efficiency with the three public utilities of these states (CEEE, CELESC and COPEL); (ii) support the evaluation and design of an electric vehicle corridor between the three states and with neighboring countries; (iii) support the coordination and exchange of experiences among the public electricity utilities of these states, and between utilities and innovation experts.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
