SIRWASH - Sustainable and Innovative Rural Water, Sanitation and Hygiene in Brazil

Project Description

The general objective of the TC is to expand the access of the population of rural areas and traditional communities to adequate and sustainable basic sanitation actions and services, through the implementation of the PSBR and through the following specific objectives: i) Strengthen the management articulated between Funasa and the agencies linked to the issue of rural sanitation at the federal level, in the states, municipalities and communities selected in the field of cooperation; ii) Qualify human resources at the national, state, municipal and local levels for the development of comprehensive and sustainable basic sanitation actions in rural areas and traditional communities in their territories; iii) Exchange experiences on tariff models used in other Latin American countries, such as the Saba Model implemented in Peru; iv) Contribute to the technological development of sanitation solutions appropriate to Brazilian rural realities, expanding the technological matrix at the household and community level.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
