Project Description

Within the framework of the Amazon Initiative, the main objective of this Technical Cooperation (TC) is to create contextualized urban development models for the challenges faced by Amazonian cities that will allow them to protect their biodiversity, stop the accelerated urban expansion and consequent deforestation, as well as attract investments related to the bioeconomy. The TC will also help intermediate cities in the Amazon Basin to develop ecological and sustainable urban development plans, facilitating their positioning as urban nodes with high environmental and urban quality standards.

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
