Amazon More Connected and Sustainable - Quality and resilient digital infrastructure for the sustainable development of the amazon region

## Quick Facts

<b>Countries</b>	Brazil
<b>Specific Location</b>	Brazilian Amazon
<b>Financial Institutions</b>	Inter-American Development Bank (IADB)
<b>Status</b>	Active
<b>Bank Risk Rating</b>	U
<b>Voting Date</b>	2025-08-07
<b>Borrower</b>	Government of Brazil
<b>Sectors</b>	Climate and Environment, Finance, Technical Cooperation
<b>Investment Type(s)</b>	Advisory Services
<b>Investment Amount (USD)</b>	\$ 0.70 million
<b>Project Cost (USD)</b>	\$ 0.70 million

## Project Description

According to the IADB, the general objective of this Technical Cooperation (TC) is to strengthen the institutional capacity of federal and subnational governments, as well as Development Finance Institutions (DFIs), to design and implement digital connectivity initiatives that drive sustainable, inclusive, and climate-resilient development across Brazil's Amazon region. Through a programmatic and coordinated approach, the TC will contribute to empowering the Amazon with a transformative connectivity strategy that drives sustainable development, investment and climate action. To that end, the TC will finance: (i) the formulation of a regional strategy for digital connectivity; (ii) the design of quality and resilient digital infrastructure solutions; (iii) the development of innovative financial mechanisms to scale investments; and (iv) the promotion of connectivity uses cases that support decarbonization. The TC will pursue the following specific objectives: (i) support the development of a comprehensive regional strategy to expand digital connectivity across the Brazilian Amazon, ensuring alignment with national and subnational priorities and fostering multi-stakeholder coordination; (ii) design and prepare investment operations and global credit programs in collaboration with national and subnational governments, as well as DFIs, with a focus on mobilizing public and private capital for digital infrastructure; (iii) develop practical use cases and pilot projects that integrate digital connectivity into initiatives aimed at reducing greenhouse gas (GHG) emissions, particularly in sectors such as sustainable agriculture, forest monitoring, telemedicine, digital education, and smart logistics.

## **ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST**

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
