Project Description

This technical cooperation (TC) aims to directly support the Presidency of COP30 by providing technical inputs on key aspects of the transition to a low-carbon and climateresilient global economy. It will integrate mitigation, and adaptation approaches by exploring how bioeconomy contributes to sustainable development, with a focus on biodiversity conservation, traditional knowledge, and climate resilience. Additionally, the TC will emphasize the role of carbon accounting, developing methodologies that account for life cycle emissions, align with the realities of countries with clean energy matrices, and support carbon credit generation through sustainable land use and bioenergy production. By addressing both financing and trade challenges, it will provide actionable insights for policymakers, investors, and international organizations, reinforcing the bioeconomy's role in global climate and economic strategies.

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
