Ainwater: Optimizing water management for access to driking water in rural areas

Project Description

According to the IADB, the objective is to improve drinking water management in rural areas through a digital platform based on artificial intelligence that allows (i) autonomous management of drinking water production for Rural Sanitation Services and (ii) facilitates decision-making in water management at the community and regional levels.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (Spanish).
