### Project Description

The general objective of the program is to improve Chile's competitiveness that fosters sustainable and inclusive economic growth. The specific objectives are: (i) to accelerate the digital transformation of public services and digital connectivity; (ii) to promote the transition to circular production models; and (iii) to encourage the formalization of employment through support for micro and small enterprises (MSE), incentives for hiring, and labor intermediation. This loan operation is the second of two consecutive single-disbursement operations, technically linked to each other but independently financed, under the modality of a Programmatic Loan to Support Policy Reforms (PBP).

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
