IADB-CH-T1191

Strengthening institutional capacity for decision making and the design, evaluat

Project Description

The project aims to strengthen the institutional capacities of public entities, specifically human capital and strategic management of information, in strategic sectors of development where evidence-based decision making is critical to the implementation of successful public policies. Thus, these entities will be able to implement advanced analyzes with massive data that contribute to: (i) improve decision-making and elaboration of sectoral public policies based on evidence; (li) to develop common diagnoses at the country level; And (iii) foster collaboration among government agencies to develop multisectoral policies in a sustainable manner over time.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
