Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	C
Voting Date	2018-07-24
Borrower	Government of Chile
Sectors	Mining, Technical Cooperation
Investment Type(s)	Grant
Investment Amount (USD)	\$ 0.10 million
Project Cost (USD)	\$ 0.10 million

Project Description

According to the bank, the objective is to design and implement a methodology of strategic analysis of territorial sustainability (AESOT, in spanish) for the central region of Chile. This methodology takes a holistic approach to land use - considering environmental, social, political, and economic aspects of the territory - in order to generate a robust and legitimate discussion framework for the development of regional land-use planning instruments and for the decision-making processes regarding the insertion and development of future small, medium and large mining projects in the central region.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
