Early Diagnosis of Diabetic Retinopathy in Chilean Health Service Using Medical Devices and Artificial Intelligence-based Pre-reports

Project Description

This project proposes to bring the "fundus eye" examination closer to diabetic patients in a region out of the capital city (Santiago). For this purpose, in the framework of the national home care program, aimed to vulnerable population affected by chronic diseases, the health personnel will be provided with a combination of technologies that will enrich and complement clinical evaluations in general and, in particular, that of diabetic patients.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
