Project Description

The objective of this TC is to promote efficiency in water and sanitation utilities through the use of AquaRating (a voluntary and universal system that offers a comprehensive assessment of the performance of water and sanitation services). The specific objectives are: (i) to support the application of AquaRating performance assessment tool in at least 5 water and sanitation utilities, so this TC will serve to fund the implementation activities while SECO's (Swiss State Secretariat for Economic Affairs) contribution is agreed and approved; (ii) to strengthen the capacity of FINDETER (Financiera de Desarrollo Territorial S.A.) and other sector institutions to promote efficiency; (iii) to promote dialogue about utilities performance among national and regional sector institutions.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
