Project Description

The objective of this TC is to design the Territorial Strategy for the Decarbonized Development of Costa Rica (TSDD), an input for the 2050 National Strategic Plan (PEN 2050), with special emphasis on the least developed rural areas of the country. This TC will allow to i) construct a spatial inventory of carbon emissions in Costa Rica to prioritize productive poles compatible with the 2018-2050 National Decarbonization Plan (DP), ii) determine the macro-level effects of proposed territorial strategy scenarios on economic and environmental variables using an Integrated Environmental Economic Model (IEEM), iii) determine the corresponding public-private investment required, and its sequencing, for the prioritized production poles to trigger deconcentrated economic growth at a territorial level, identifying investment in quality and resilient infrastructure to boost competitiveness and generate productive opportunities with social inclusion.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
