Project Description

The Inter-American Developmetn Bank has released little information about this project as of the time of writing. On its website, it says that the obective of the project is to support the Government of the Dominican Republic in the integration of the development of a comprehensive risk management system that considers climate and natural disaster risk scenarios, implementing flood risk model HydroBID-Flood to prioritize the interventions in road assets. The technical cooperation will also update the national road network inventory and qualify diagnosis of bridges and corridors, as well as strengthen the technical criteria for the design, planning and prioritization of transport infrastructure.

The technical cooperation is divided into two operations with unspecified roles and responsibilities.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
