Promotion of the Information Technology Industry Development in the Dominican Republic through the strengthening of territory-based initiatives and the sectoral entrepreneurship

Project Description

According to the IADB, the objective is to contribute to the development of the Information Technology (IT) industry in the Dominican Republic by strengthening territory-based initiatives and the sectoral entrepreneurship ecosystem. To achieve this objective, the operation seeks to generate strategic knowledge on the development of the country's IT industry, its ecosystem, and existing territorial-based initiatives that support its growth, with the aim of identifying opportunities and developing proposals to strengthen and further advance the sector's development.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
