### **Project Description**

Contribute to improve the country's competitiveness through institutional environments that promote the efficiency and transparency of the economy. The above will be achieved through: (i) strengthening mechanisms for dialogue and coordination between the public and private sectors that allow the deployment of an effective scheme for productive development; (ii) improve efficiency and transparency in the delivery of public services that generate high transaction costs to the productive sector; (iii) support the provision of vertical public goods that address the specific problems of productive sectors with greater growth potential.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (Spanish).
