<b>Investment Amount (USD)</b>	\$ 140.00 million
<b>Loan Amount (USD)</b>	\$ 140.00 million
<b>Project Cost (USD)</b>	\$ 140.00 million

## Project Description

As stated by the IADB, the main objective of the CCLIP is to contribute to the environmental sustainability of the Ecuadorian energy sector through the promotion of private investment in non-conventional sources of energy. In this sense, the CCLIP seeks to improve the credibility and attractiveness of the Ecuadorian electricity sector by implementing risk mitigation mechanisms, such as liquidity guarantees, that address the key concerns of private investors and financiers. These mechanisms seek to create a safe and reliable environment for private investment in energy, promoting the development of renewable projects.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
