Project Description

The Technical Cooperation (TC) has as general objective to produce key inputs for a project to improve the management of public assets, by building several elements that make up the system, laying the groundwork for the subsequent improvement of the index of maturity. Specifically, this will be achieved through: (i) strengthening governance and institutional capacity related to asset management; (ii) the development of the basic regulatory framework for the management of public assets of the central government in Ecuador, including a roadmap for the development of processes and secondary regulations; and (iii) the design of the technical specifications of the information system for the registration and management of public assets, whose implementation of which would be financed by operation EC-L1224.

Investment Description

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
