Project Cost (USD)	\$ 0.28 million

Project Description

The objective of this Technical Cooperation is to collect data about the environments to which students are exposed to, including household composition, socioeconomic status, and other relevant variables that might affect student development. Furthermore, this Technical Cooperation will also gather information regarding student's behavior from the students' households through the use of various instruments such as the Strengths and Difficulties Questionnaire (SDQ) which can capture the psychosocial perspective of children and young people, their parents and teachers.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
