Strengthening Electrical Integration and Moving Forward with the Ecuador-Peru Interconnection

Project Description

According to the IADB, the objective is to support Ecuador in strengthening the technical and institutional capacities required for the effective implementation of the operation RG-L1140 "Ecuador - Peru Power Interconnection System in 500 kV, Ecuadorian line", promoting the safe, resilient, and efficient operation of the power system while contributing to regional energy integration.The specific objectives of this Technical Cooperation are: (i) strengthening the operational security, stability, and resilience of the regional electrical interconnection among Ecuador, Colombia, and Peru by enhancing the power system's control, coordination, and response capabilities under scenarios of high renewable energy penetration and operational contingencies; and (ii) strengthening the technical and institutional capacities of Ecuadorian power sector entities for the planning, regulation, and operation of interconnected power systems, in line with international standards and the requirements of regional energy integration.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
