IADB-ES-L1145

National connectivity network for the digital transformation in El Salvador

Project Description

The general objective is to increase the access of the citizens of El Salvador to fixed and mobile broadband services initially for education and health, under a comprehensive model that guarantees the sustainability of the provision of these services in the long term, at a technical-operational and financial level. To achieve this, the following specific objectives are established: (i) improvement of connectivity through investment in infrastructure for a National Connectivity Network as the basis for the Digitization of El Salvador; (ii) improvement of the conditions for adopting digital infrastructure solutions; and (iii) increase in institutional and operational capacity that allows the development of the 2020-2030 National Digital Agenda promoted by the Ministry of Innovation of the Presidency, as the governing body of all government institutions on innovation and technology issues.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
