| Investment Amount (USD) | \$ 0.50 million |
| Project Cost (USD) | \$ 0.50 million |

Project Description

From the IDB: "This TC aims to provide a new updated O-D matrix for the passenger trip patterns and the corresponding transport model for the Metropolitan Area of San Salvador. The current matrixes have not been significantly updated for more than ten years, therefore several adjustments are required to consider variations in quantity and distribution of trips. These elements are the basis of appropriate urban transportation planning, traffic management and operations."

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
