Borrower	Government of Guatemala
Sectors	Communications, Infrastructure
Ring Fence	Small & Medium Enterprises
Investment Type(s)	Loan
Investment Amount (USD)	\$ 1.00 million
Project Cost (USD)	\$ 2.00 million

### Project Description

Improve accessibility and bridge the digital divide, especially in rural areas in the Northern Triangle countries, by providing internet for low-income people and SMEs to boost economic recovery. The project seeks to improve accessibility to internet services and to close the digital divide, especially in rural areas in the countries of the Northern Triangle, by providing internet for low-income people and SMEs. The project will support the efforts of Wayfree - a company created in 2019 - and to bring internet to underserved areas or with limited access to this service to users in public areas with high agglomeration of people, such as main squares and municipal markets. Wayfree has developed an innovative business model that seeks to provide Internet connectivity massively and, in some cases, free (or almost free) of charge, to people and businesses through a wide network of transmission points, in areas where Internet operators do not provide services or do so poorly. An innovative feature of Wayfree's model is to make alliances to lower the costs of the infrastructure associated with bringing internet services to last mile users.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
