Investment Amount (USD)	\$ 350.00 million
Loan Amount (USD)	\$ 350.00 million
Project Cost (USD)	\$ 350.00 million

Project Description

According to the IADB, the overall objective is to contribute to improving the connectivity of international trade nodes for regional integration in a safe and climate change resilient manner. The specific objectives of the operation are to: (i) improve the level of service of the corridor; and (ii) contribute to increasing climate resilience to flooding in the project's area of influence.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
