## **Project Description**

According to the IADB, the general objective is to reduce avoidable mortality and disability by improving the availability and use of essential health services among underserved populations in targeted communities (communal sections) of Haiti's Greater North (Northwest, North, and Northeast departments). The specific objectives are to: (i) strengthen the management of the health system as an integrated network; in the targeted communities, (ii) extend the coverage of an integrated and progressive package of services; (iii) foster users' participation in the care of their health; and (iv) gradually improve the response capacity of the health facilities serving the communities.

**ACCOUNTABILITY MECHANISM OF IADB**

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
