Investment Type(s)	Advisory Services
Investment Amount (USD)	\$ 0.38 million
Project Cost (USD)	\$ 0.38 million

Project Description

According to the IADB, the objective of this Operational Support Technical Cooperation (TC) is to support the Government of Haiti, through MEF, in the preparation of future investment operations under the Haiti More Connected connectivity investment program, particularly the first operation focused on the international submarine cable landing in Haiti. The TC will finance the pre-feasibility, technical, geospatial, economic, financial, legal, institutional, environmental and social, and operational inputs required to structure a neutral operator and/or wholesale connectivity model for Haiti's future digital connectivity infrastructure, potentially structured as a Public-Private Partnership (PPP), concession, Operation and Maintenance contract or other contractual arrangement depending on market, legal, and institutional feasibility. The specific objectives are: (i) conduct comprehensive structuring studies to assess the economic, legal, institutional, environmental and social and operational viability of the first Haiti More Connected operation and related future operations; and (ii) provide specialized technical, project management, Environmental, Social, and Governance (ESG) compliance support, resilience, security and procurement preparation support to ensure that the analytical outputs can be translated into practical inputs for investment operation design and execution.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
