### Project Description

The objective of this project is to "demonstrate that lower cost, more efficient and innovative designs for solar rural electrification" can deliver quality 'access to energy' to remote rural villages of Honduras, where the electrical grid is not likely to expand in the near future. This will "contribute to improve livelihoods of isolated off-grid communities in Honduras through modern energy for lighting and productive activities." See the documents attached for further information.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
