Private Investments Incentive Mechanism for Rural Solar Energy in
Honduras

Quick Facts

Countries	Honduras
Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	U
Voting Date	2016-10-21
Sectors	Energy
Investment Type(s)	Grant
Investment Amount (USD)	\$ 0.20 million
Project Cost (USD)	\$ 0.52 million

Project Description

The objective of this project is to "demonstrate that lower cost, more efficient and innovative designs for solar rural electrification" can deliver quality 'access to energy' to remote rural villages of Honduras, where the electrical grid is not likely to expand in the near future. This will "contribute to improve livelihoods of isolated off-grid communities in Honduras through modern energy for lighting and productive activities." See the documents attached for further information.

Investment Description

- Inter-American Development Bank (IADB)

Contact Information

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
