Project Description

The general objective of the program is to improve and recover the role of the Francisco Morazan hydroelectric power station (CHFM by its acronym in Spanish) as an effective asset to provide flexibility and integration of variable renewable energy (ERV) to the Honduran electricity system. The specific objectives are: (i) to improve the plant's operational reliability and efficiency as an asset to increase ERV's participation in the National Interconnected System (SNI); (ii) integrate the CHFM to the System Operator (OdS); and (iii) carry out studies to evaluate the increase in its generation capacity.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
